

# Roba-ProfiDisc Surface sanding machine

The disc sanding tool with quick change system

**Sanding quality - one step ahead**

## Roba-ProfiDisc

### ... operation areas

- \* intermediate lacquer sanding
- \* wood fine sanding
- \* MDF sanding
- \* metal sheet deburring

### The patented Roba-ProfiDisc

principle is used for sanding of flat and profiled surfaces.

### The 3-axis

#### rotational sanding disc system:

1. axis: rotating disc
2. axis: disc wheel containing four rotating discs.
3. axis: the whole aggregate containing three disc wheels is oscillating

All axis are separately adjustable. Due to this the user is able to influence the sanding optics essentially.

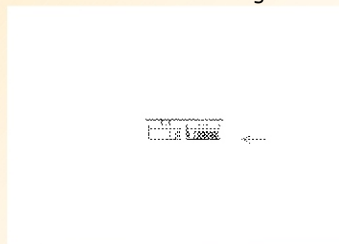

#### Advantages:

- The sanding behaviour is similar to that of an eccentric hand sander
- optimized „obliteration“ of sanding marks
- all work pieces are sanded with high quality

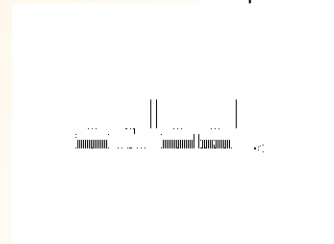

## Machine configurations Roba-ProfiDisc

All variants are equipped with vacuum transport system

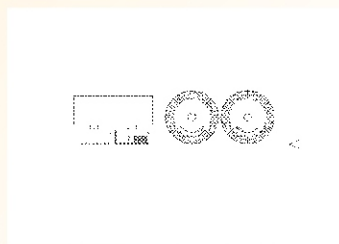

ProfiDisc S – Single

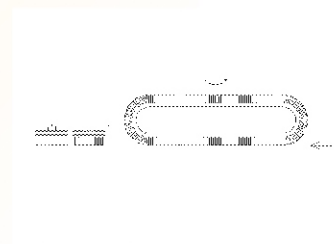

ProfiDisc D - Duplex

ProfiDisc S-DB with double brush

ProfiDisc S-Tech with brush belt
